

About Hurner

Hurner is a new vertical under Marco Building Services Pvt. Ltd., a company with a strong legacy in HVAC and refrigeration systems. With Hurner, we have stepped into full-scale manufacturing, bringing greater control, precision, and efficiency to every product we deliver.

Manufacturing Capabilities

Our capabilities include a dedicated in-house design and engineering team supported by advanced manufacturing infrastructure such as:

CNC laser cutting machine

CNC 200-ton press brake

Sub-arc welding systems

In-house powder-coating facility

MIG/ CO₂ welding machines

This integrated setup enables us to maintain superior quality standards, optimize production timelines, and offer custom-built solutions for diverse industrial requirements.

Product Category

Steel Doors

Fire Rated Doors

Engineered to meet stringent fire safety norms, Hurner Fire Rated Doors provide reliable protection against fire and smoke spread. Manufactured using high-grade steel and precision welding, these doors ensure structural integrity, safety compliance, and long-term durability for industrial, commercial, and institutional applications.

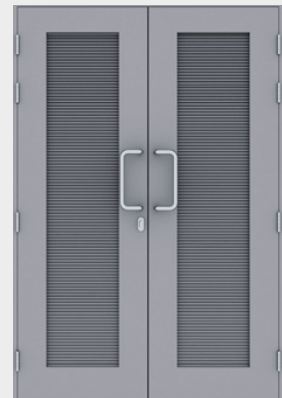

Standard Steel Doors

Our Standard Steel Doors are designed for strength, security, and everyday reliability. Built with precision-fabricated steel panels and robust hardware, they offer excellent performance in high-traffic industrial and commercial environments while maintaining a clean, professional finish.

Louver Doors

Hurner Louver Doors are designed to allow controlled ventilation without compromising security. Precision-cut louvers ensure proper airflow, making them ideal for utility rooms, HVAC spaces, and industrial enclosures.

Water-Resistant, Air Tight & Acoustic Doors

These specialized doors are engineered to provide superior sealing against water ingress, air leakage, and noise transmission. Ideal for clean rooms, laboratories, and controlled environments, they deliver optimal insulation, hygiene, and acoustic performance.

Product Category

Insulated Doors

Coldroom Door

Designed for temperature-controlled environments, Hurner Cold Room Doors offer excellent thermal insulation and airtight sealing. Manufactured with high-quality insulated panels, they help maintain consistent temperatures while reducing energy loss.

Facemounted Swing Doors
(Single And Double Leaf)

Sliding Doors

Hatch Doors

Freezer Room Doors

Built for extreme cold conditions, our Freezer Room Doors are engineered for durability, efficiency, and frost resistance. Precision insulation and sealing ensure long-term performance in cold storage and frozen processing facilities.

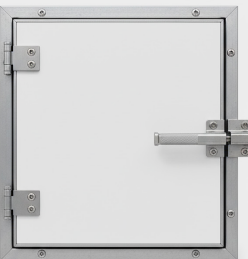

Facemounted Swing Doors

Sliding Doors

Hatch Doors

Product Category

Lab Furniture

Laboratory Wall Bench

Ergonomically designed and fabricated using corrosion-resistant materials, Hurner Lab Wall Benches provide a sturdy and functional workspace, optimized for laboratory efficiency and safety.

Lab Chemical Storage Cupboard

Designed for safe storage of chemicals and laboratory supplies, these cupboards feature robust construction, proper ventilation options, and secure locking mechanisms to ensure compliance with laboratory safety standards.

Lab Wall Table With Sink

Our Wall Tables with integrated sinks are ideal for wet lab applications, offering seamless functionality, easy maintenance, and durable finishes suitable for frequent use.

Lab Furniture and Tables

(4-Seater)

Hurner offers custom-designed lab furniture solutions tailored to client requirements, combining modular design, durability, and ergonomic efficiency.

Corner Table Set (GI)

Designed to maximize laboratory space utilization, our Corner Table Sets provide seamless integration with other lab furniture while maintaining functionality and workflow efficiency.

Chemistry Laboratory Table

Specifically designed for chemistry labs, these tables are built to withstand chemical exposure, heat, and heavy usage, ensuring safety, durability, and long service life.

Product Category

**Sheet Metal
Fabrications.**

Electrical Panel Cabinets/ Enclosures

Precision-fabricated electrical panel enclosures designed to protect electrical systems from dust, moisture, and external damage. Manufactured using CNC processes for accuracy, safety, and compliance with industrial standards.

Stainless Steel Tables & Seating Systems

Hurner Stainless Steel Tables and Seating Systems are built for hygiene-critical and heavy-duty environments. Corrosion-resistant, easy to clean, and structurally strong, they are ideal for laboratories, clean rooms, and industrial facilities.

Architectural Customized Metal Fascade System

Our customized metal façade solutions combine aesthetics with structural performance. Designed and fabricated to architectural specifications, they enhance building exteriors while ensuring durability and weather resistance.

Product Category

Material Handling Systems

Storage Racks

Hurner Storage Racks are designed for efficient space utilization and high load-bearing capacity. Custom-built to suit warehouse and industrial requirements, they ensure organized, safe, and scalable storage solutions.

Modular Mezzanine Floors

Our Modular Mezzanine Floors provide cost-effective vertical space expansion without altering building structures. Designed for strength, flexibility, and easy installation, they optimize warehouse and industrial floor usage.

Conveyors

Engineered for smooth and efficient material movement, Hurner Conveyors are custom-designed to integrate seamlessly into production and logistics workflows, improving operational efficiency and reducing manual handling.
